

Modelling Materials

Leaflet

1. First of All

Learn how to make these simple shapes. You will be able to use them in lots of different ways to build up super models. They are very easy to make with your hands or simple tools like a plastic knife or a pencil. Never use sharp knives or scissors - they can be dangerous.

2. Colour Mixing

Modelling material colours can easily be mixed to make lots more colours. By moulding two or more colours together in your hands you can get a marble effect with streaks and swirls in it. When you mix them up

completely you will get brand new colours.

3. Layering

Building up modelling material in layers is great fun! Put different coloured circles on top of each other and you have an amazing cake to cut into. You can even put a modelling material cherry on top!

Stick different coloured modelling material logs together and you can make a super snake or a lovely lighthouse.

4. Making Pictures

It's easy to make 3-D pictures with modelling material. Roll out a large flat square of modelling material or use a square of card or thin wood. Build your picture up on it by cutting out the shapes

you want from flat pieces' of modelling material and sticking them on to the square. You can make pictures of houses, funny faces or anything you want.

5. Press a Pattern

There are lots of things you will find around the house to help you press a pattern into your modelling material. You can use a key, a coin, a comb, a pencil and lots

of other things. You will always get a perfect picture in the modelling material. Why not see how many things you can think of to use to make patterns?

6. Letters

Modelling material can easily be made into all the letters of the alphabet. You can even write your name with modelling material. Simply cut out the letters from a flat piece of modelling material and put them together to spell your name. You can roll out thin logs, bend them

round to make letters and stick tiny balls on the ends. You can even make a really thin log then write your name with it. Can you think of any other ways?

9. Animal Fun

You can have great fun making funny animals out of modelling material. You can make mad monsters in all shapes and sizes, pet dogs, funny frogs - in fact why not have a competition with your friends to see who can make the funniest animal? You can also

make puppet heads. Make the head, push a hole in the bottom for your finger, make some clothes out of an old piece of material and you've got a great hand puppet.

7. Moon City

Making a model like Moon City is easy with modelling material.

Make lots of simple shapes and you can build them up into anything you want like this model of Moon City. It's made up of logs, balls,

blocks and simple cut-out shapes put together to make a space station. You can make anything you like out of modelling material.

10. Mosaics

A mosaic is simply a picture made up of lots of small pieces. Modelling material mosaics are very simple to do. Make lots of little modelling material balls and

build them up bit by bit to make any sort of pattern or picture you like. When you have finished you can press them flat to fix them

firmly in place. You can also cut out small square tiles and put them together in the same way.

8. Fruit Bowl

You can make yourself a bowl of fruit that looks good enough to eat with modelling material. Simply cut the shapes out of flat pieces of modelling material, and put them

together to make a super 3-D picture. In the same way you can make bowls of flowers, pot plants, trees and bushes.

Washing Instructions

Modelling material can be removed from most fabrics. In the unlikely event of modelling material sticking to clothes or carpets the following steps are advised:

1. Please check any cleaning instructions on the item from which modelling material is to be removed. If the item requires dry cleaning consult a reputable cleaner before proceeding.
2. Remove excess modelling material from the garment or carpet.
3. Using a small nail brush and cold water, wash out the remaining modelling material.
4. A small amount of washing up liquid will assist you in restoring your carpet or garment to its original condition.
