

Modelling Times

Issue 4
Summer 2019

Welcome

Welcome to the fourth issue of 'Modelling Times', an occasional publication designed to keep our customers up to date with new products and other developments. For more information on any of our products, please visit our website or call us to discuss your requirements in more detail.

All Products Wheat and Gluten Free

Our high quality play dough is now **wheat and gluten free**, along with all of our other products. *Finger Soft Dough* has been reformulated to replace wheat flour with gluten free alternative ingredients. The improvements did not stop there, though: the dough is softer and easier to use, particularly for small children, moulds better and extrudes more reliably than the previous version.

NovaClay

We are delighted to announce the official launch of a new product, **NovaClay**. Developed specially for the educational market, NovaClay is a budget alternative to Newclay for cost-conscious schools. It is **wheat and gluten free** and is soft and easy to use.

NovaClay is available in 'stone' and 'terracotta' versions, both fibred for added strength and fibre-free for those who prefer their modelling clay in a more natural form. Current products are:-

NovaClay 12.5kg Bag Fibred: Stone, Terracotta

NovaClay 12.5kg Bag Fibre-Free: Stone, Terracotta

NovaClay 4.5kg Bag Fibred: Stone

NovaClay 2.5kg Tub Fibred: Stone, Terracotta

NovaClay 2.5kg Tub Fibre-Free: Stone, Terracotta

Other products will be introduced in due course, as demand dictates.

Please note: **NovaClay** is not suitable for professional sculpting and other high-end applications. Newclay is still available and is the same high quality modelling clay that it always has been for over 50 years.

New Finger Soft Dough Products

6 x 150g Pots

Boxes of **wheat and gluten free** 6 x 150g Pots of Finger Soft Dough have been available for many years containing one pot each of white, yellow, orange, red, blue and green dough. These boxes are now available in a neon version, containing one pot each of fluorescent yellow, pink, orange, red, blue and green dough.

24 x 150g Pots

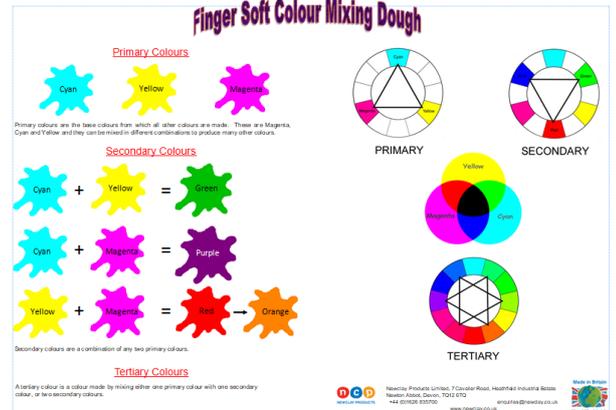

Our boxes of **wheat and gluten free** 24 x 150g Pots of Finger Soft Dough are designed primarily for educational use. Each box contains two pots each of white, yellow, orange, red, blue and green dough, and two pots each of the neon (fluorescent) colours yellow, pink, orange, red, blue and green dough.

Colour Mixing Dough

Finger Soft Colour Mixing Dough helps young children learn about colours and what happens when they are mixed together. Each **wheat and gluten free** 1.8kg tub contains two pieces each of yellow, cyan and magenta dough. The tub contains a **free** colour mixing chart to encourage young children to experiment with colour and observe the results.

Did You Know?

The two versions of hardeners we make were developed specially to give their best performance with Newclay. The good news is that they also give excellent results with NovaClay. Hardener H1 is dissolved in hot water and painted on to the model's surface, giving a 'case hardening' effect. Hardener H2 is mixed directly into the clay, giving the model an 'all through' hardness. The same is also true for our Gloss and Satin finishes, modelling wire and modelling tools.
